

“PANOPRIMA” VILLAS: RULES FOR THE SAFE HOSPITALITY OF PETS

The accommodation of small pets, belonging to our guests, is possible (after **agreement** with the Owners and without additional payment) with the **basic condition** that they will fully apply the 1. The animals will be accommodated with the care and responsibility of our guests, who will also take care of their proper nutrition, cleanliness and health.

2. Animals are prohibited from entering the swimming pool (at any time) and they also cannot use the outdoor shower (nor obviously any indoor one).

3. Pet owners must collect and transport any animal waste as well as their food leftovers and place them on the same day in the bins of the Municipality of Aigialeia (green bins).

4. Animals are not allowed to climb onto the beds and sofas of each villa and much less to sleep with their owners or their children.

5. On the contrary, pet owners must transport the special pillows / bases from their homes (where their animals sleep) so that they feel like they are in a familiar environment.

6. In the event that other guests or friends/visitors are present in the common areas of the complex (swimming pool, bbq, courts, gardens, etc.), the animals must be on a leash held by their owners or be isolated in a closed/covered area, so that they do not approach other people other than their owners.

7. In addition to the above, the rules of proper/good coexistence between our guests also apply and at the same time mutual respect and understanding must prevail between the families being hosted (e.g. avoid continuous and persistent barking, especially during quiet hours, or at night).

8. For any problem that may arise with the pets or between the various families of our guests (related to the animals), please inform immediately the owners or managers of each villa.

We thank you for your willingness to cooperate and implement the above and we wish you a peaceful and relaxing stay, for you and our four-legged friends.

The Owners and Manager of “PANOPRIMA VILLAS”.
